|---------------------------------|--|
| <b>Hometown</b>                 | Spring City, PA  |
| <b>I've been modeling</b>       | Since 1983 – Almost 30 years!  |
| <b>My first RC plane</b>        | Midwest Soarer – 2 meter glider  |
| <b>First plane I crashed</b>    | Midwest Soarer   |
| <b>I got started</b>            | with rubber band powered planes. My uncle and I were out flying one day when I heard a buzz in the air a short distance away. I went to investigate and found an R/C field and guys flying gliders. I revisited that field a few more times and got the itch to fly R/C. Since I had building skills from my rubber powered experience I knew that building R/C would be easy. |
| <b>My favorite RC plane</b>     | It's hard to say. I've had so many. Right now it's my 3DX Hobbies Electric Extra Foamie. My Midwest Extra 300 27% scale should be but I've had too many engine problems. I'm working on others.  |
| <b>My preferred Model Class</b> | Powered Gliders, but I'll fly almost anything. Slow ones though!   |
| <b>Model being built</b>        | Lanier Stinger 120   |
| <b>My wish list includes</b>    | Byron A-4 Skyhawk ducted fan jet. (I've had the kit for 25 years!) I also want to build a 1/4 scale WACO CG-4A.  |
